

INSTALLATION INSTRUCTIONS

APB1000A EMERGENCY ACCESS PANEL

SPECIFICATION

Switch Type: (2) DPST (Form C)
Switch Rating: 3A @ 30VDC
(Resistive/Inductive)
Siren: 13mA @ 24VDC

Emergency Access Panel used for unlocking an electronic lock in the event of an emergency. The panel has a mushroom button that includes a key to reset along with a siren.

Some installations require that the wiring be enclosed within a conduit.

A 4 gang electrical deep box may be used to enclose the switches.

Suggested wall cutout to mount panel.
