

GL Series

Electric Gate Locks

SDC's GateLok™ GL series electric gate locks are designed to provide access control and remote locking and unlocking capability for manual or automatic chain link, tubular steel and wrought iron sliding or swinging gates. Although designed for 3" fence post and a 2" gate post, GL series locks are adaptable for smaller sizes. GL series locks provide higher security than electromagnetic locks.

All GL series locks are equipped with stainless steel bolts, heavy gauge weatherized steel housing and automatic relock switches. Automatic relock switches keep the bolt retracted until the gate is in the closed position. All can be unlocked by an access or remote control.

GL163AI and GL263AH models may also be unlocked by a built-in keyswitch.*

GL260MRAH models may also be unlocked by a built-in mechanical release mortise cylinder. The mechanical release is for momentary override and does not maintain a sustained unlocked mode. Unlike GL260A and GL263A models, GL260MRA mechanical release models will retract the bolt even without DC power.*

- Sliding or swinging tubular steel and wrought iron gate design
- Heavy gauge weatherized housing
- Stainless steel bolt
- Automatic relock
- Field reversible handing
- Field selectable dual voltage
- Voltage and current spike protection

*Key cylinders not included, order separately. See related products.
